9100/9600 Models

Classic Steel
Affordable steel door that offers more insulation and design options.

Sonoma panel, Almond finish, decorative hardware
style. safety. variety
these are no ordinary garage doors.

Built for performance and affordability, Models 9100 and 9600 offer robust features with a variety of options at affordable prices, adding style and curb appeal to your home. These doors are chosen by homeowners for their insulating value, durability, style and safety features.

These are no ordinary garage doors.

performance features

The TorqueMaster® Plus counterbalance system seals springs safely inside a steel tube to prevent accidental release of tension that could cause injury. TorqueMaster® Plus features anti-drop safety technology.

Tamper-resistant safety bottom brackets help avoid possible injury by preventing inadvertent loosening when the counterbalance cables are still under tension.

Door panels are engineered with pinch-resistant design to prevent finger injuries while the door is closing.

Wayne Dalton doors feature horizontal integral struts at the top and bottom of door sections which adds rigidity and strength for long life and smooth operation.

Models 9100 and 9600 come with foamed in place polyurethane insulation with an R-value* of 9 for Model 9100 and R-value of 11 for Model 9600. Insulation can improve your home’s thermal efficiency, reduce street noise and make the door operate more quietly.

Models 9100 and 9600 are available with structural reinforcements for use in coastal regions. They meet wind load requirements of the International Building Code, Florida Building Code and Texas Dept. of Insurance.

*R Wayne Dalton uses a calculated door section R-value for our insulated doors.
